Department for the Survey and Inspection of Buildings,

OFFICE, No. 2 FOURTH AVENUE.

New York, February 28th 1871

PLAN AND SPECIFICATION

For Alterations, Additions, or Repairs to Buildings already Erected.

The undersigned gives notice that Mr. Nimmann owner or lessee of premises No. 201 2nd Street near Brewery proposes to alter or enlarge the building thereon, in the manner described below, and respectfully requests that said premises be examined, and a permit granted for such alteration or enlargement.

The present building is built of brick, 3 stories, 40 feet in height, 18 1/2 feet front, 40 feet deep, with tin roof.

The foundation walls are built of Stone, 20 inches thick. The upper walls are built of brick, 12 inches thick, and 40 feet in height from curb level.

If independent walls, state the fact yes

If party walls, state the fact _____

If there is any other building on the lot, state the fact no

DESCRIPTION OF PROPOSED ALTERATIONS, ADDITIONS, OR REPAIRS.

If raised or built upon, give

1. Number of stories when altered _____
2. Number of feet in height when altered _____

If extended on the front, rear, or either side, give

1. Width and depth of extension 11.6^m by 18^{ft} in Rear
2. Numbers of stories 2 stories & Basement
3. Number of feet in height 27 ft.
4. Depth, thickness, and materials of foundation walls 4 ft below the ground with 18^m thick blue stone walls
5. Thickness, and materials of upper walls 8^m brick walls in Ringston Lime and sharp sand
6. In what manner the extension is to be connected with the present building by 2 doors in Each floor.

Handwritten signature

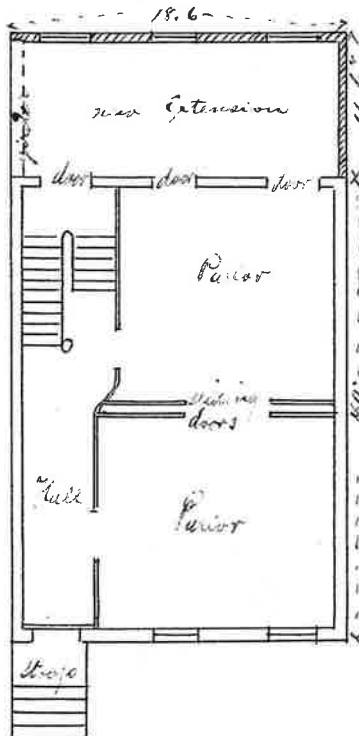

If internal alterations are to be made, give definite particulars.

If the front, rear, or side walls, or any portion of the same, are to be taken out and rebuilt, state in what manner, *The rear windows of house will be cut down so as to form doors. The westerly sidewall of Extension will have in each story a 8x9" girder supported by 4x6" joists 12" from centers instead of an 8" wall girder to be well anchored into the Sidewall of old house.*

THE BUILDING WHEN ALTERED WILL HAVE

- 1. Style of roof *flat*
- 2. Materials of roofing *tin*
- 3. Materials of cornices *wood*
- 4. Access to roof *scuttle ladder*
- 5. Fire escape, if required _____
- 6. Iron shutters, if required *no*
- 7. How to be occupied *by one family the whole house*

Make diagrams showing present building and main points of proposed alterations or additions.

Give the probable cost of the proposed alteration *\$ 1800.*

That all materials and construction will be in conformity to the provisions of the law.

Owner *Riemann* Residence *20 2nd Street*

Architect *Zmlygraul* Residence *413 E. 14th Street*

REPORT UPON APPLICATION.

New York, March 6 1871

To the Superintendent of Buildings:

I respectfully report that I have examined the above-named premises, and find said building to be built of brick storey, 40 feet in height, 15 feet front, 110 feet deep, flat roof. The foundation walls are built of stone inches thick; the upper walls are built of brick inches thick, and 40 feet in height from curb level.

independent wall, side wall party-wall, and in a good and safe condition to be altered and enlarged in the manner proposed, and in conformity with the provisions of the several laws relating to buildings in the City of New York.

W. M. ...
Deputy Superintendent of Buildings.

REMARKS:

[Lined area for handwritten remarks]

REPORT OF INSPECTOR.

New York, May 1st 1871

To the Superintendent of Buildings:

Work was commenced on the building described herein on the 2^d day of April, and completed on the 24 day of April, and has been done in accordance with the plans and specifications except as noted below.

Respectfully submitted,
William Dickers
Inspector.

REMARKS:

All of the above complied with without violation

[SUPPLEMENT.]

In all Tenement Houses having Stores on the first floor, and built to contain two or more families on a floor above the store, the ceiling above the store must be constructed as follows:

Lathed with iron lath throughout, or deafened with good mortar not less than one inch thick, and levelled with the top of the beams; and, if the deafening is used instead of the iron lath, then there must be, in addition to the deafening, a space lathed with iron lath not less than two feet wide, against all walls that are furred; and in all cases where iron lath is used on any ceiling it must be let into the horizontal joints of the brick walls not less than one-half inch. All hall partitions in such buildings must be either 8-inch walls built from the foundation to the top of the second story beams: or, if the partitions are built of wooden joists, the partitions must be filled in with brick or lathed with iron lath on the hall side of the partition. All wood-houses placed in the cellars of tenement buildings must be constructed fire-proof.

In all new buildings that require fire-escapes, the iron brackets or bearers for the fire-escape must be built into the walls as the building of the wall progresses, and the fire-escape completely finished before the building is occupied.

Inspectors are required to report forthwith any person or persons violating any of the foregoing provisions.

JAS. M. MACGREGOR,
Supt. of Buildings.

NOTICE: This Application must be Typewritten, and Filed in Triplicate

Computation Application No. 154 1921 Violation No. 3648 1921

City of New York, November 23, 1921

To the Superintendent of Buildings:

In compliance with the requirements of Section 132 of the Building Code of the City of New York, I have estimated the weight that the respective floors, or varying parts of such floors, of the following-described building, located in the Borough of Manhattan, will safely sustain upon each superficial foot thereof; and hereby file this computation, with the request that the same be examined and approved by you. I further request that I be furnished with a copy of such estimate when approved; and, as required by the Building Code, I agree to post a copy of such approved estimate in a conspicuous place on each story, or varying parts of each story, of the building to which it relates. I also agree to notify the Superintendent of Buildings of the Borough of Manhattan as soon as such approved computation has been properly posted. Plans are attached hereto (on sheets of tracing linen or cloth not exceeding 8½ by 14 inches) showing the framing for each floor and a section showing posts and girders, with the sizes and spacing of all materials marked thereon.

PREMISES 22 Second Street
