Note.—In making application for the erection of buildings the following drawings must be turnished:
Plans of each and every story, front, rear and side elevations, and longitudinal and transverse sections.
All plans must be drawn to a uniform scale and must be on tracing cloth, properly designated and
colored.
THE BUILDING LAW REQUIRES:
1st—All stone walls must be properly bonded. 2d—All skylights having a superficial area of more than 9 square feet must be of iron and glass.
3d—All buildings over two stories or above 25 feet in height, except dwellings, school houses, and churches, on streets less than 30 feet wide, must have iron shutters on every window and opening above the 1st
story. The front windows on streets over 30 feet wide are exempted.
4th—Outside fire escapes are required on all dwelling houses over two stories in height, occupied or built to be occupied by two or more families on any floor above the first, and on dwellings more than four
stories in height, occupied by three or more families above the first floor, and on office buildings, hotels
and lodging houses, factories, mills, workshops, hospitals, asylums and schools, all to be constructed as follows:
BALCONIES MUST NOT BE LESS THAN THREE FEET WIDE.
BRACKETS must not be less than 14x 174 inches wrought iron, placed edgewise, or 174 inch angle iron 13 inch thick, well braced, and not more than three feet apart, and the braces to brackets must be not less than 74 inch square wrought iron, and must extend two-thirds of the width of the respective brackets or batcomes. In all cases the brackets must go through the wall, and be turned down three inches.
In all cases the bracacts must go through the wall, and be turned down three inches.  Brackers on New Buildings must be set as the walls are being build. When brackets are to be put on old houses, the part going through the wall shall not
Tor Ratis.—The top rail of balcony must be 1% inch x is inch wrought too or 1% inch angle from 14 inch thick, and in all cases must go through the walls, and be secured by nurs and 4 inch square washers, at least 36 inch thick, and no top rail shall be connected at angles by the use of cast iron.
In all cases the brackets must go through the wall, and be turned down three inches.  BRACKETS ON New BULLDIAGS must be set as the walls are being built. When brackets are to be put on old houses, the part going through the wall shall not be less than one inch diameter, with screw nuts and washers not tess than dive inches square and 1/2 inch thick.  Tor RAILS.—The top rail of balcony must be 1/4 inch x 1/2 inch wrought tron or 1/4 inch angie from 1/4 inch thick, and in all cases must go through the walls, and be secured by must and 4 inch square washers, at least 2/4 inch thick, and no top rail shall be connected at angles by the use of cast iron.  BOTTON RAILS.—Dottom rails must be 1/4 inch x 3/4 inch wrought iron or 1/4 inch angle iron 1/4 inch thick, well leaded into the wall. In frame buildings the top rails must go through the studding and be secured on the inside by washers and nuts as above.  FILLING-IN BAILS.—The filling-in bars must be not less than 1/2 inch round or square wrought iron, placed not more than 6 inches from centres, and well riveted to the low and bettom rails.
to the top and bottom rails.  Status.—The stairs in all cases must be not less than 18 inches wide, and constructed of 14 x 315 inch wrought from sides or strings. Steps may be of cast iron of Status.—The stairs in all cases must be not less than 18 inches wide, and constructed of 14 x 315 inch wrought from sides or strings. Steps may be of cast iron of Status.—The stairs in all cases must be not less than 18 inches wide, and constructed of 14 x 315 inch wrought from sides or strings. Steps may be of cast iron of Status.—The stairs in all cases must be not less than 18 inches wide, and constructed of 14 x 315 inch wrought from sides or strings.
Status.—The stairs in all cases must be not less than 18 inches wide, and constructed of 14 x 314 inch wrought iron sides or strings. Steps may be of cast iron of the same width of strings, or 54 inch round iron, double rangs, and well rivered to the strings. The stairs must be secured to a bracket or attained as at the bottom. All stairs must have a 34 noch hand rail of wrought iron, well braced.  From .—The flooring of balconies must be of wrought iron 14 x 34 inch shade and or over 114 noche, apart, and secured to iron battens 114 x 34 inch, not over

FLOORS.—The flooring of balconies must be of wrought from 1½ x ½ inch slats placed not over 1½ inche many, and secured to iron battens 1½ x ½ inch, not over three feet apart and riveted at the intersection. The openings for stairways in all balconies shall not be less than 20 inches wide and 36 inches long, and have no covers.

Drop Ladders.—Drop ladders from lower balconies where required shall not be less than 11 inches wide, and shall be made of 1½ x ¾ inch sides and ¾ inch rungs of wrought iron. In no case shall a drop ladder be more than 12 feet in length. In no case shall the ends of balconies extend more than nine inches over the brackets. Scenario Sce

No Fire Escape will be approved by this Bureau if not in accordance with above specifications.

5th-All walls must be coped with stone or terra cotta. If coped with stone, the stone must not be less than 21 inches thick; and if with terra cotta, the terra cotta must be made with proper lap joints. 6th—Roofs must be covered with fire-proof material.

7th—All cornices must be fire-proof.

Sth-All furnace flues of dwelling houses shall have at least eight inch walls on each side. No furnace flues shall be of less size than eight inches square, or four inches wide and sixteen inches long, inside measure. If preferred, the furnace flues may be made of cast iron or fire-clay pipe of proper size built in the walls, with an air space of not less than one inch between said pipes, and four inches of brick wall

All flues not built for furnace or boiler flues must be altered to conform to the above requirements before they are used as such.

Sth-No iron beam, lintel, or girder, intended to span an opening over eight feet, intended to support a wall, shall be used for that purpose, until tested and approved as provided by law.
