THE BUILDING LAW REQUIRES
2d.—All skylights, over 3 feet square, must be of iron and glass. 3d.—All buildings over 2 stories or above 25 feet in height, except dwellings and churches, on streets and.—All buildings over 2 stories or above 25 feet in height, except dwellings and churches, on streets less than 30 feet wide, must have iron shutters on every window and opening above the 1st story. The front windows on streets over 30 feet wide are exempted. 4th.—Outside fire escapes are required on all dwelling houses over two stories in height, occupied or built to be occupied by two or more families on any floor above the first, and on office buildings, hotels, lodging houses and factories; and the balconies of such fire escapes must take in one window of each suite of apartments, all to be constructed as follows: BRACKETS must not be less than \$\frac{1}{2}\$ inch square wrought iron, and must extend two-thirts of the width of the respective brackets or balconies. In all states must be not less than \$\frac{1}{2}\$ inch square wrought iron, and interections. BRACKETS on New ButlebitsS must be seasing through the wall, and be turned down tree inches through the wallshall not be less than one inch diameter, with screw nuts and was when brackets are to be put on old houses, the part going through the wallshall not be less than one inch diameter, with screw nuts and was when brackets are to be put on old houses, the part going through the studing and be secured by it inch, which iron, and in classes must be sugare and it inch thick. In through the studing and be secured to be \$\frac{1}{2}\$ inch wrought iron, well leaded into the wall. In frame buildings the top rails must go hrough the studing and be secured to be \$\frac{1}{2}\$ inch wrought iron, well leaded into the wall. In frame buildings the top rails must go well braced. Filling-in-Bais.—The filling-in bars must be not less than \$\frac{1}{2}\$ inch wrought iron, did not be strings. The stairs must be secured to a bracket on top and be secured to a bracket or extra cross bar at the bottom
less than 2½ inches thick; and if with terra cotta, the terra cotta must be made with proper lap joints. 6th.—Roofs must be be covered with fire-proof material. 7th.—All cornices must be fire proof. 8th.—All furnace flues of dwellinghouses shall have at least eight-inch walls on each side. The inner four inches from the bottom of flue to the top of the second tier of floor beams, shall be built of fire brick laid with fire-clay mortar. No furnace flue shall be of less size than eight inches square, or four inches wide and sixteen inches long, inside measure. When furnace flues are located in the usual chimney stacks, the side of the flue inside of the house to which it belongs may be four inches thick. If preferred, the furnace flues may be made of cast iron or fire-clay pipe of proper size built in the walls, with an air space of not less than one inch between said pipes, and four inches of brick wall on the outside. All boiler flues must be lined with fire-brick at least fifteen feet in height from the bottom, and in no case shall the walls of said flues be less than eight inches thick. All flues not built for furnace or boiler flues must be altered to conform to the above requirements before they are used as such.

DUPLICATE.

PRESIDENT BOROUGH OF MANHATTA

CITY HALL. ko. 5137 Dermission is hereby given ...on the building situate at and known as said bay-window feet in width and feet in length, outside face measurement, exclusive of cornices, pilasters and trim. Extent of projection to be-The total space occupied to be 0 in payment for which the rate of compensation has been fixed at. The person or persons to whom this permit is issued hereby agrees that the erection, construction and maintenance of the bay-window....hereby mentioned shall be constructed and maintained in accordance with the general ordinances relating thereto. This permit is issued subject to revocation thereof at any time hereafter by the Board of Aldermen of The City New York, upon the recommendation of the Commissioner having jurisdiction, when the space occupied by said way, or any portion thereof, may be required for any public improvement; or upon any violation of any of the terms or conditions upon which this permit is squed the sum Dollars, Clerk. Table of fixtures to include fixtures reset where new roughing is installed. Size of House Sewer......Fall per foot.......

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF

Lanhattan

, CITY OF NEW YORK

NOTICE—This application must be typewritten and filed in quadruplicate. All proposed work under this application must be shown on plans and section. All vertical lines of soil, waste, leader and refrigerator pipes should be designated by numbers or letters. A soil or waste line and its attendant vent line may be considered as one stack, and so numbered or lettered. In alterations, NEW WORK ONLY should be specified. When new fixtures are to be connected to present lines, the location and diameter of said lines must be shown on the plan. Minor alterations in connection with work described may be included in this form.
