REPORT UPON APPLICATION.
BUREAU OF INSPECTION OF BUILDINGS,
NEW YORK Work 1862
to the Superimental of Buildings:
I respectfully report that I have thoroughly examined and measured the building, walls, etc.,
named in the foregoing application, and found the foundation wall to be built of 16
inches thick, feet below curb, the upper wall built of inches thick,
feet deepfeet in height, and that the mortar in said wall is
hard and good, and that all the walls arein good and safe condition.
What is the nature of the ground?
What kind of sand was used in the mortar?
How is or was the building occupied?
(The Investor and I
(The Inspector must here state what defeats, if any, are in the walls, beams or other part of the building.) The "state the thickness of each english each and energy stam.)
The "state the thickness of each wall in each and every story.)
