If volume of building is to be increased, give the following information: (6) Area² of Building as Altered: At street level

sq. ft. cu. ft.

(7) Total Height³ The term "height" of a structure shall mean the vertical distance from the curb level to the highest point of the roof beams in the case of flat roofs or to a point at the average height of the gable in the case of roofs having a pitch of more than one foot in four and one half, except that in the case of structure where the grade of the street has not been legally established or where the structure does not adjoin the street, the average level of all the ground adjoining such structures shall be used instead of the curb level.

In computing this area, measurement shall be taken to the outside surfaces of exterior walls at each floor. Courts, yards, etc., shall be excluded. Total height shall be measured from 6 inches below the lowest finished floor to the outside of the roof, and in case of sloping roofs, to the average height. Cubic Contents⁴

The cubical contents is the actual space enclosed within the outer surfaces of the outside walls and between the outer surface of the roof and six inches below the surface of the lowest floors. This includes the cube of dormers, penthouses, vaults, pits, enclosed porches, and other enclosed appendages. Outside steps, terraces, footings, courts, yards, light shafts and buildings detached from the main structure are not to be included. (Detached structures are to be separately computed.)

(8) Character of Present Building:

Frame-Non-fireproof— yes Fireproof-

State which mechanical work will be installed:

(Proper form must be filed)

Fire-Protected-Metal-Heavy Timber-

(9) STATE GENERALLY IN WHAT MANNER THE BUILDING WILL BE ALTERED: Propose to remove partitions shown on all stories and erect new stud plaster partitions forming new Bath Rooms, Closets Foyers, door openings and rearrangement of rooms as shown. Remove present mear Fire Escapes and erect new Fire Escapes on front and rear of building as indicated on plans. Present Dumbwaiter Shaft to be discontinued, door opening blocked in and new chimney installed within shaft enclosure for use of Boiler Room in cellar. Erect new Boiler Room in cellar of 4" Terra Cotta blocks. Remove the present front stoop and re-arrange entrance as shown on plans. Remove the present wood stairs thru-out and replace with new Iron Stairs. Fire Retard all Hall Partitions and Halls thru-out and provide Fire Proof

Self Closing Doors thru-out to apartments.

Remove the present Chimney brests as shown on plans.

AEW. C. OF G. WILL RE OBTAINED 7/18/14/ TOS

If the building is to be raised in height or if the occupancy is changed so that the floor loads will be increased, information as to the Existing Building and the thickness of existing walls and size of footings must be clearly shown on the plans.

If the building is to be enlarged or extended, the nature of soil must be indicated and plans must clearly show material and thickness of footings, foundations, upper walls, partitions, roofing, fireproofing, interior finish, window frames and sash and details of equipment installations.
